ISMARCO STORY

Since the dawn of history,

Stone has been the silent language of the Earth.

With it, humankind carved its earliest thoughts upon the rocks.

And from the heart of the mountains, raised the pillars of civilization.

In Persia, the artisans of the Achaemenid Empire shaped **limestone**

into palaces whose perfect geometry reflected the **wisdom of Iran.**

In Athens, the magical **Pentelic marble** gleamed beneath the Greek sun, becoming temples that elevated beauty to a divine realm.

In Machu Picchu, high in the Andes, stones were laid without mortar — not to dominate nature, but to live within its embrace.

From the **Pyramids of Egypt** to the **Colosseum of Rome**,
from the **Great Wall of China** to **Persepolis**,
stone has always carried a single timeless message:
**Eternity, balance, and the bond between
humankind and the Earth.**

And today, in the heart of Iran —
where mountains and culture meet —
This ancient legacy is reborn.

ISMARCO continues that eternal dialogue —
between nature and intellect, East and West, past and
future.

At ISMARCO, we **reimagine the spirit of Iranian
stone**

through the language of contemporary design;
we carve the beauty of nature into modern forms,
and give new meaning to the heritage of civilizations
for today's world — and for generations to come.

Stone, The Enduring Language of Civilizations

At **ISMARCO**, we see stone not as a raw material but as a living language, a language that speaks of beauty, authenticity, and humanity's bond with the Earth.

Our **mission** is to reawaken the spirit of Iranian stone through contemporary design, crafting each piece as a bridge between history and the future, art and function, Earth and mind.

Stone, The Timeless Dialogue of Civilizations

ISMARCO envisions becoming a timeless dialogue between civilizations, where stone becomes the universal language of art, nature, and culture.

Our vision is to create a world where Iranian stone is not merely a building material but a source of inspiration for design and human imagination.

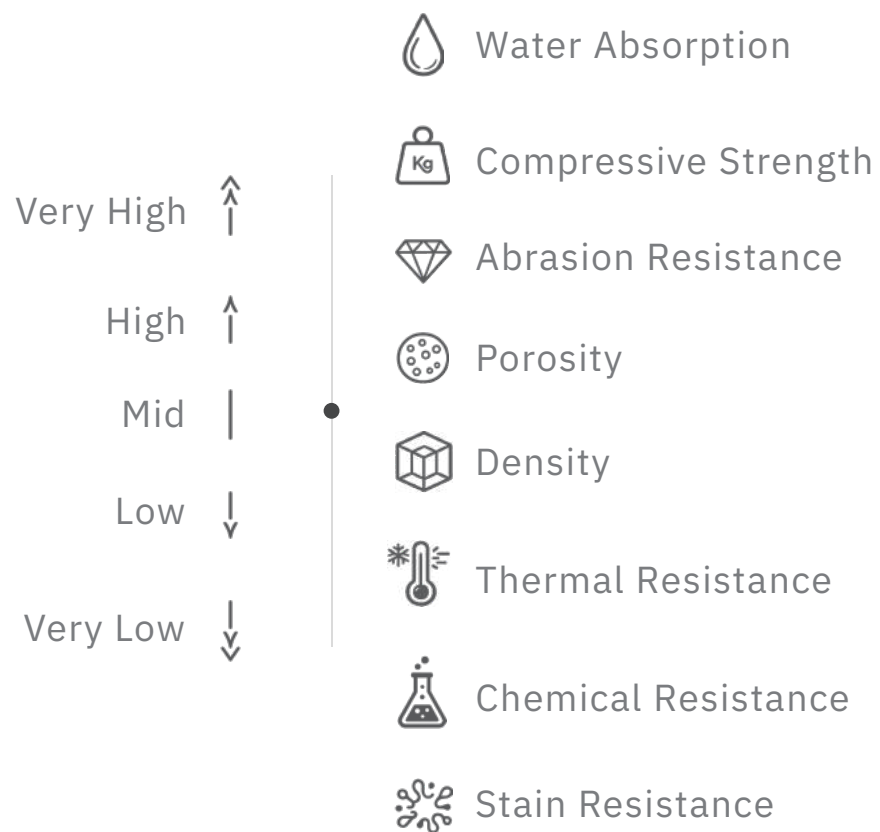

GUIDE

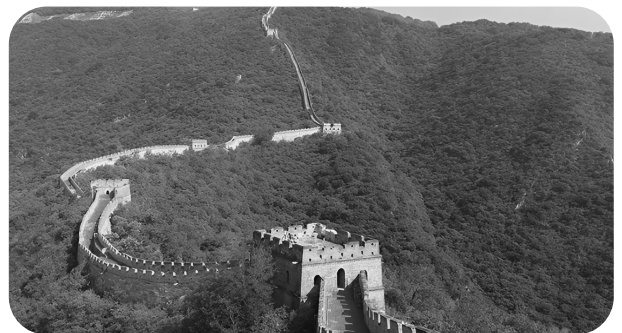

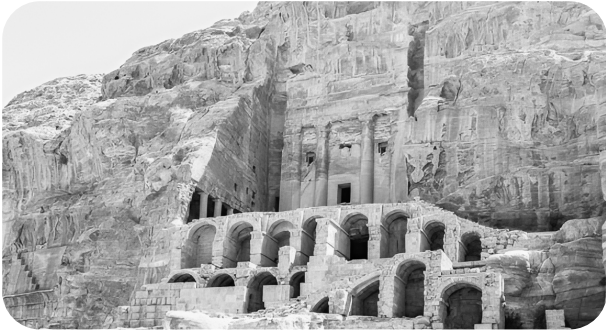

Symbols Legend

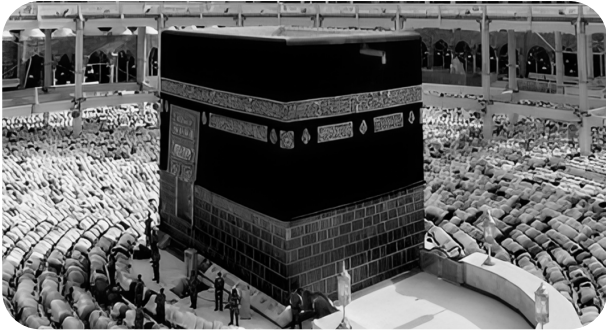

To navigate this living language, the Symbols Legend serves as your essential compass, unveiling the deeper meaning behind every catalog icon.

The stone's quantitative rhythms are expressed through a dynamic five-tier arrow system, translating its natural traits from a subtle whisper (very low) to a profound resonance (very high).

Through this visual vocabulary, the raw physical truths of each piece—such as its intimate porosity, natural permeability, enduring density, and beyond—are meticulously charted, allowing you to read the very anatomy of the Earth.

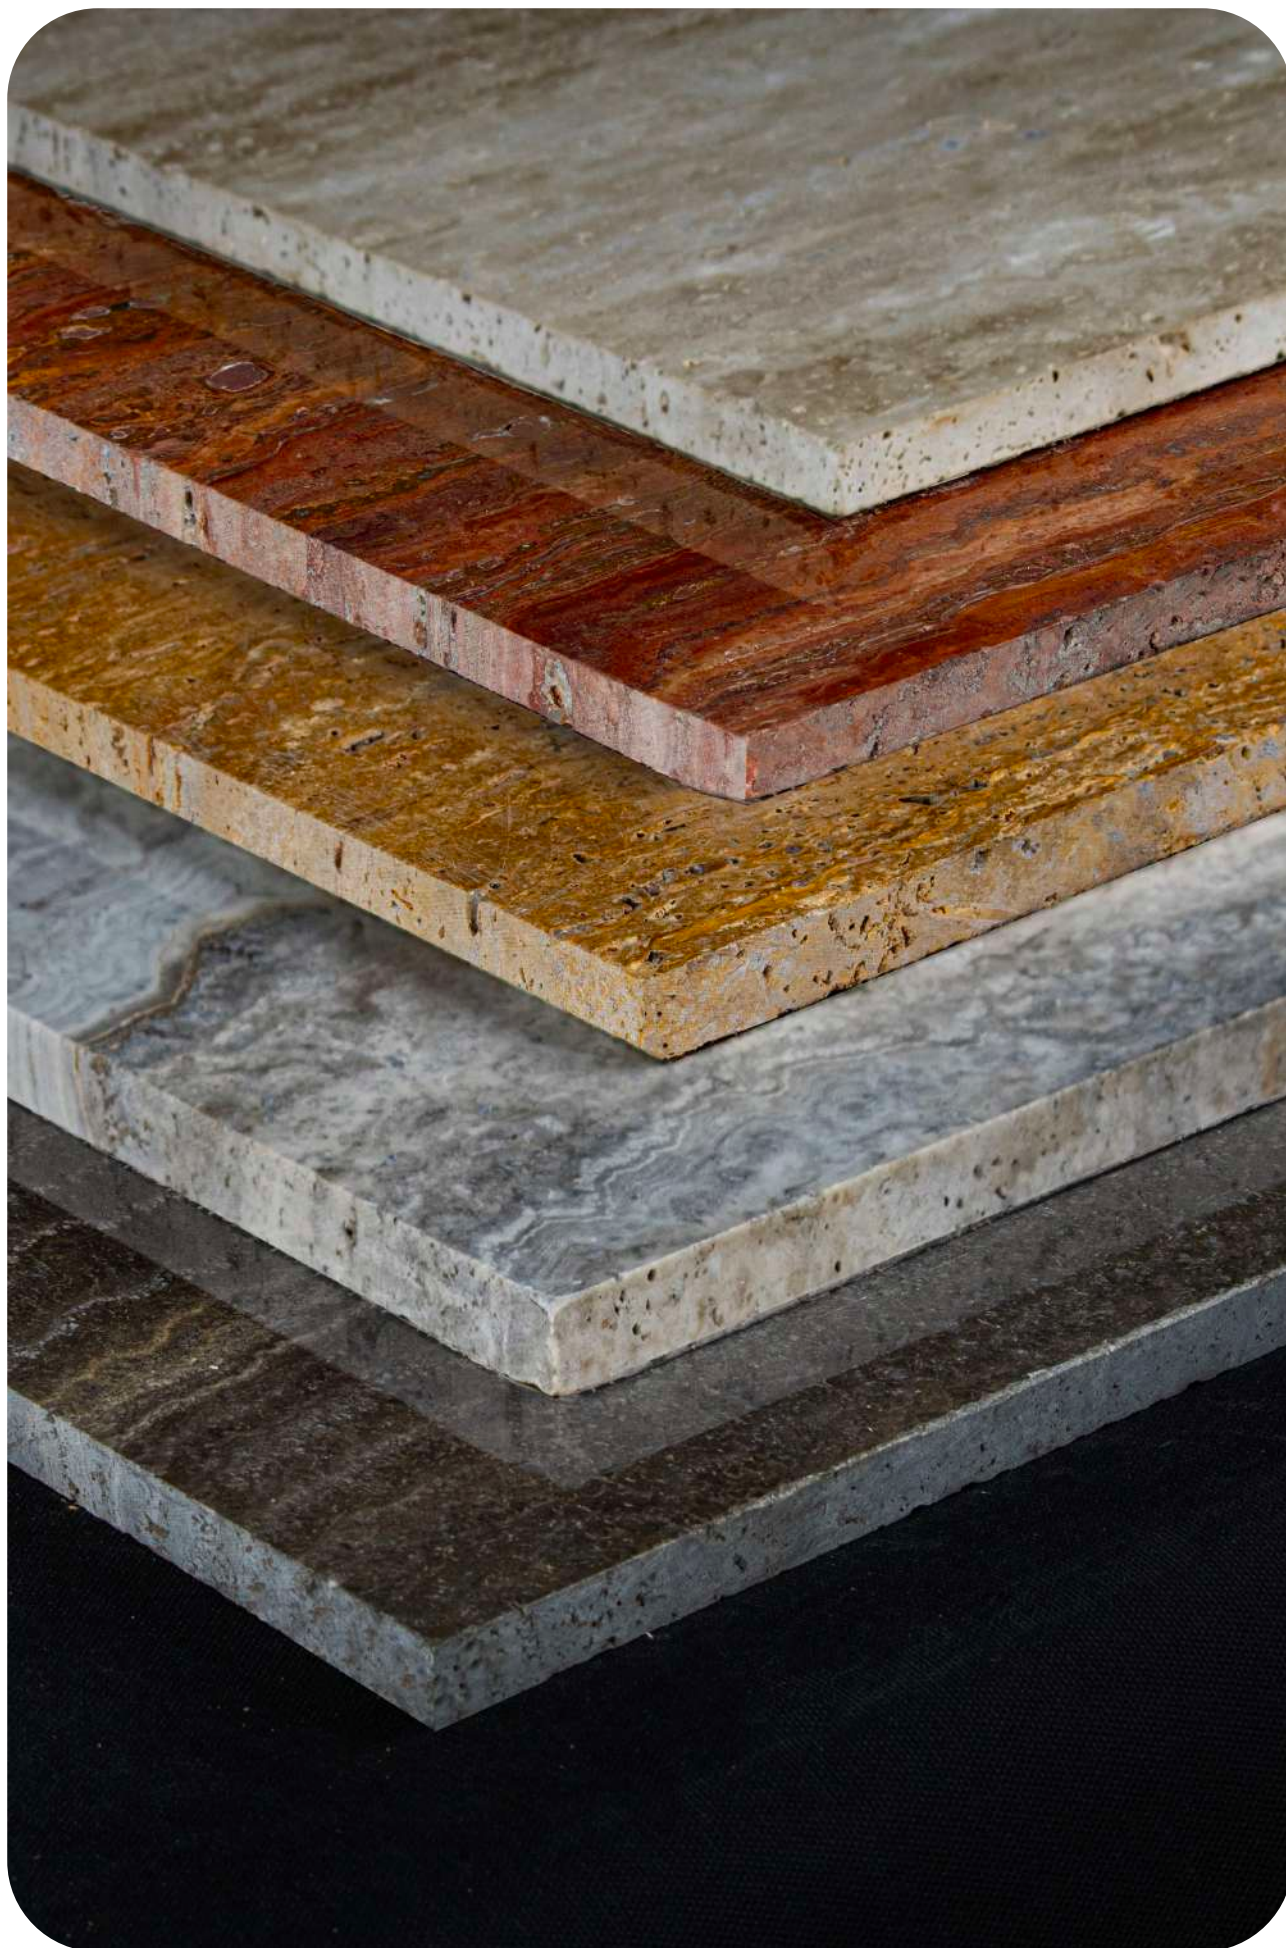

The Timeless Art of Architectural Beauty —

ISMARCO travertine products are crafted using advanced stone-processing technology and specialized expertise. Precision cutting, consistent finishing, and a reliable supply make our stones a trusted choice for demanding architectural projects.

Starting with carefully selected blocks, the travertine is cut into large slabs and precisely sized into cut-to-size tiles using modern machinery. These stones are available in various thicknesses to accommodate a wide range of structural and design needs.

We offer three surface finishes—Brushed, Honed, and Polished, in both Filled and Unfilled options. Produced in Cross-Cut and Vein-Cut techniques, our stones also support Vein-Match installation to create continuous, harmonious natural patterns.

Whether used for interior flooring, exterior wall cladding, or custom architectural elements, **ISMARCO** travertine delivers a timeless aesthetic backed by uncompromising quality.

Marble, The Classic Essence of Natural Elegance —————

Crafted using cutting-edge technology and meticulous workmanship, **ISMARCO** marble products guarantee exact dimensions, uniform quality, and dependable availability. Premium marble blocks are transformed into expansive slabs and custom-fitted tiles to suit a broad spectrum of architectural purposes.

ISMARCO marble is available in six finishes: Sandblasted, Brushed Sandblasted, Brushed Bush-Hammered, Brushed, Honed, and Polished. For exterior use, Sandblasted, Brushed Sandblasted, Brushed Bush-Hammered, and Brushed finishes are recommended due to their durability and slip resistance, while all finishes are suitable for interior applications. Although marble is less suitable for kitchen countertops because of its sensitivity to staining and etching, it is an excellent choice for vanities, wall cladding, interior flooring, and decorative architectural elements. With its refined aesthetics, diverse finishes, and precision manufacturing, **ISMARCO** marble offers architects and designers a durable and elegant solution for interior spaces and selected exterior applications.

Granite, The Enduring Strength of Natural Beauty ———

Engineered through advanced machining and precise fabrication, ISMARCO granite delivers exact dimensions, uniform finishes, and steadfast durability. We convert premium raw blocks into large-format slabs and custom-cut tiles tailored for rigorous architectural demands.

Granite offers exceptional resistance to abrasion, impact, moisture, and temperature changes, making it ideal for high-traffic interior and exterior spaces. Polished granite is recommended for kitchen countertops due to its low porosity, scratch resistance, and heat tolerance, while non-slip finishes are ideal for parking areas, ramps, driveways, and other outdoor applications. However, because granite contains trace heavy minerals, it is generally not recommended for large residential living areas with long-term occupancy.

Combining natural beauty, outstanding durability, and precision manufacturing, **ISMARCO** granite provides architects and designers with a reliable solution for a wide range of interior and selected exterior applications.

Crystal, Pure Harmony of Light, and Clarity —————

ISMARCO crystal bridges raw durability with architectural precision. We process high-grade blocks into dimensionally flawless slabs and cut-to-size tiles, built specifically to meet demanding structural requirements.

ISMARCO crystal is available in three surface finishes: Polished, Sandblasted, and Brushed Sandblasted. The polished finish enhances brightness and elegance for interior spaces, while the sandblasted finishes provide excellent slip resistance and durability for exterior and mixed-use applications.

With its balanced physical properties, clean appearance, and structural strength, **ISMARCO** crystal is suitable for flooring, wall cladding, staircases, facades, and decorative architectural elements. Combining timeless aesthetics with reliable performance, it offers architects and designers a versatile solution for a wide range of interior and exterior projects.

Onyx, The Radiant Spirit of Pure Luxury —————

ISMARCO onyx products are crafted from carefully selected premium-grade blocks, ensuring exceptional clarity, rich color depth, and striking natural translucency. The superior quality of these stones makes them an ideal choice for luxurious and high-end interior environments where visual impact is essential.

Onyx is highly valued for its unique veining, crystalline structure, and the ability to transmit light, creating dramatic effects in contemporary and modern designs. It performs exceptionally well in applications such as TV walls, luxury lobbies, feature walls, reception areas, vanities, and decorative interior elements, where elegance and artistic expression are the primary focus.

With its rare beauty and refined character, **ISMARCO** onyx elevates interior spaces by adding a sense of sophistication and exclusivity, making it a preferred selection for premium residential and commercial projects.
